

DR. NICOLE BARYLA

Nicole Baryla joined the Ontario Institute for Cancer Research (OICR) Commercialization team in 2010 as the Project Manager for the Princess Margaret Hospital-OICR- Pfizer collaboration (POP-CURE) which was initiated to discover and validate new targets for the diagnosis, prognosis and treatment of colorectal cancer. Nicole brings a strong track record of effective cross-functional communication, building and maintaining relationships with internal and external partners, and a diverse range of knowledge in research to her role at OICR.

Prior to joining the Institute, Nicole was a Senior Research Scientist at Eli Lilly Canada Inc. where she was the lead analytical scientist working to develop appropriate control strategies to support the development and commercialization of new pharmaceutical products. Nicole has eight years experience working in the pharmaceutical industry with extensive experience in analytical method development/validation, project management, method/technology transfer and global regulatory submissions. She joined the Lilly Analytical Research Laboratory in 2002 as a postdoctoral scientist where she held an NSERC Industrial Research Fellowship.

Nicole holds a B.Sc. (Hons) in Chemistry from the University of Manitoba and a PhD in Analytical Chemistry from the University of Alberta. She is currently pursuing a certificate in Business Management from the University of Toronto.
