

INVITED SPEAKER

Dr. Daniel Mori, PhD, Amnis Tech Specialist, Luminex

Daniel obtained his PhD in Immunology at the Upstate Medical University in Syracuse, NY. His graduate work was focused on understanding the effects of altered carbohydrate metabolism on T-cell function. His postdoctoral work at the Yale School of Medicine in New Haven was on studying the effects of aging on adaptive immunity in the context of solid organ transplantation.

Daniel joined the Luminex team in early 2019 as the Amnis Tech Specialist for the Northeast US and Eastern Canada.
